We (C/A, WH) saw it more as so "risky"
(despite SU intentions that C/A/WH know,
(that Rumsfeld didn't - though th unusually
forecast the reality)
(as did Aug-King for Rep!)

given 1) th couldn't believe, too unrealistic,
that th could monitor every intel
operation

But th did, till Oct 14
and could have longer, with SAMs

th
and advised off. cap. with too much
safety, then enough to detect intrusion

could have to.

Some officials were ready to accept!

(Why didn't VFR attack on Oct 16-17?

(Small chance of 1-2 MRBMs!

and then of intel:

(Why didn't C/A foresee this: US & collaboration?

Thought th would see missiles
long before operation?

But McCon did not - SAMs!

(on this, he pressed every.)

VFR for more "lowly" detected (from GW! ^{British Jocks} than VCS!
